

Title: Brainstorming

Project Name:

Food Ordering Behaviour and Consumer Trends Dashboard

Objective:

To analyze customer food ordering patterns and identify key business insights using Tableau dashboards and stories.

Brainstorming Ideas:

- Analyze total number of food orders.
- Identify the most popular meal types.
- Compare online and offline payment methods.
- Analyze customer ratings and satisfaction.
- Study order values across different customer segments.
- Identify peak ordering hours and busy days.
- Compare delivery performance across locations.
- Analyze the impact of discounts on customer purchases.
- Identify high-value customers and ordering frequency.
- Create interactive dashboards with filters and KPIs.

Expected Outcome:

The dashboard will help businesses understand customer behavior, improve service quality, increase customer satisfaction, and make data-driven decisions to improve revenue.
